

Band Slicer

The newest addition to our line of high quality unit equipment, our band bread slicer conforms to the same high standards as all of our other equipment, providing ease of use, and maintenance. A fully integrated solution that works well in tandem with one of our bagging units, or any other make that you use in your bakery. It synchronizes and communicates with related units, and will perform as an integral part of your modern high speed bakery. It provides the performance and high volume output you expect, reliably, consistently, and dependably slicing with minimal maintenance and easy controls for operation and troubleshooting.

Perforated Stainless Steel Panels provide easy views to the interior of the unit, and open fully to provide easy access for maintenance and blade replacement.

Heavy duty lattice blades with a strong and stable support frame to keep blades properly tensioned through the blade guides to provide consistently well cut slices.

Synchronizes with downstream and upstream equipment.

Easy to use, intuitive operator panel with simple and easy control of all aspects of the unit.

DESIGN NOTES

Modular Design

Sized to fit in a typical layout

Modular belting for ease of cleaning and maintenance

PERFORMANCE

60 - 70 Loaves Per Minute
(4 in. Loaf)

Blade Speed from 600 - 200 FPM
with a 400 FPM Average

Band Slicer

Unit Advantages

Unit and Drum Drives

- Quiet, low maintenance belt drive system
- 5 HP motor and control starter with electric motor brake
- Blade Drum Oiler
- Lower Blade Drum Scraper
- Closed Weld Mild Steel Drums

Blade Control and Spacing

- Hansalloy lattice blades with offset blade guides
- Accommodates 3/8" to 5/8" blades
- Slide out lattice guides for easier maintenance

Additional Features

Conveyors

- Stainless Steel flighted discharge conveyor
- Easily adjustable infeed and discharge guides
- Stainless Steel drive guard rails
- Conveyors can be electronically synchronized to bagger for more reliable performance
- Loaf hold down at discharge conveyors

Easy Maintenance by Design

- Pneumatic release and engagement of drum hubs for easy and fast removal
- Quick release mechanism on lower drum scraper for faster cleaning and removal
- Wide opening doors facilitate easier maintenance and sanitation
